

## ELECTROMECHANICAL TECHNICIAN

### Your Mission:

- As an Electromechanical Technician / Installer, you will be responsible for the assembly and commissioning of our automated systems for industrial clients.
- You carry out the mechanical, electrical, and pneumatic assembly of machines and automated installations, ensuring compliance with technical drawings, quality standards, and internal procedures.
- You perform commissioning, fine-tuning, and adjustment of the systems to ensure their proper and reliable operation.
- You install and start up our equipment both in Belgium and abroad, supporting customers through to successful handover.
- You are responsible for maintenance tasks, troubleshooting, and repairs on installed systems, ensuring efficient and timely resolution of technical issues.
- You work closely with engineering and production teams to ensure the quality, performance, and reliability of the machines produced.

### We Offer:

- An opportunity to take initiative and grow in a collaborative environment built on collective intelligence
- A competitive salary package aligned with your experience, including additional benefits
- Permanent contract
- 35 days off
- Luncheon vouchers (8 €)
- Bonus in the company's profits
- Group and hospitalisation insurance
- Real development opportunities within the company

### Your Profile:

- You hold a technical diploma in Electromechanics (secondary education, technician level, or Bachelor's degree) or equivalent experience.
- You are independent, structured, and take responsibility for your work.
- Ideally, you have previous experience in machine building or in the assembly of automated industrial systems.
- You are willing to travel for installations and commissioning activities, both within Belgium and internationally.
- You are fluent in French and German. Bilingual proficiency (French/German) is considered a strong asset for this position.

We don't just offer you a job, we offer you the chance to build the factories of the future !
